

USER GUIDE TO ONLINE PHARMACY STORE

=>Procedure to Run and Operate the app (CUSTOMER):

- + If you are a new person, create an account by 'sign in' option and enter the required details like Name, Password.
- + If you are an already existing user then you may directly use log in option.
- + After Logging in, enter whether you want to enter as an Admin or as a User.

+ a) Entered as User:

- Add the Name of Medicine along with quantity in the interface.
- Incase, the stock has less quantity of medicine than required, it will deny to add the medicine to cart.
- Similarly, Add as many medicines as the user wants to cart.
- Each time A medicine is added , Final status is asked from the user Y/N
 - =>Y=Item is added to bill also(User wants to order)
 - =>N=Item is added to cart only.
 - Final bill along with price, quantity and details of Medicine is generated.
 - Do proceed for Payment.
 - Your order is successfully proceeded and will be out for delivery in the next few working days.

❖ b) Entered as Admin:

=>Procedure to Run and Operate the app (ADMIN):

- Show Patient Details: List details of patients, it takes PID as input and displays details of the respective patient.
- Sales Details Between Two Dates: Admin can analyse the details of sale by giving input between any two dates.

- Update Stock: Admin can update the price & Quantity of any Medicine as per his requirement.
- Olap-1(Number of Employees from different departement and cities)
- Olap-2(Medicines details sold between particular dates)
- Olap-3(Count of medicines sold between two particular dates)
- Olap-4(Quantity of medicines per Supplier)
- Prescription Details: Admin can see prescription details.
- Details of medicines ordered recently.

Unique Features Implemented:

1. Review & Feedback system implemented so that customer as well as admin can analyse the response of users.
2. Discount Policy 10% has been applied for users purchasing Medicines >5000 rupees.
3. Trigger has been implemented which automatically adds item to bill when the users responds "Y" for each Product added in cart.
4. Error handling has been applied in following cases:
 - ❖ *If user tries to order a medicine more than stock, in such cases, the software denies.*
 - ❖ *If an Unregistered user tries to directly Login.*
 - ❖ *Same person tries to register more than once.*
